#### INSTRUCTIONS FOR USE

**Before use carefully read the instructions on the can and consult the SDS for safe handling of the product (Sec. 7.1).**

Use between 10 and 25 °C on surfaces at the same temperature, in well ventilated environments. Mask the parts not to be treated. Remove residues of rust or paint not anchored and degrease. Shake the can vigorously for approx. 2 minutes from the moment you feel the mixing balls. Make a spray test on a separate surface. Spray a layer in cross-over passes, from a distance of 20-25 cm. If necessary repeat the application after 15 minutes. On plastics we recommend the use of the special primer. Every time you finish the application, turn the can upside down and spray for a few seconds until the product comes out so you can clean the valve and spray head.
